HAMMOND SERVICES IS THE ANSWER TO ALL YOUR HOMEWORK QUESTIONS

Steve Pattison had a small leak on a water main under his Barnesville home. He was sure it was just a minor problem, and even considered tackling the job himself. However, he called the plumbing professionals at Hammond Services and is very glad he did. "Their service technician, Noah, came out and repaired it in very short order," he said. But, the service – and helpfulness – did not stop there. "He allowed me to watch while he repaired it, and Noah explained some things to look for after the repair and discussed with me some maintenance items that were important for the future," Mr. Pattison explained. "I appreciated Noah taking the time to explain some of the plumbing aspects while he repaired the line, and I haven't had any problems since then. Noah was very knowledgeable, and I am glad I didn't try to repair the line myself because there could have been some pressure problems that I was not aware of. In turn, that could have cost me a whole lot more to repair. He did a great job, had the right tools and did it right the first time.
